

MP DOCUMENTATION:

API and Credits References

APIs and Libraries Used:

The project was developed primarily using built-in Java libraries and systems. Main libraries and APIs used include:

- `javax.swing`
- `java.awt`
- `java.lang.Thread`
- `java.sound`
- `java.util`

These libraries were utilized for graphical user interface development, rendering systems, multithreading, audio implementation, utility handling, and overall gameplay functionality.

Software and Development Tools

The following software and tools were used during the development of the project:

- Tiled Map Editor — used for creating tile-based maps and world layouts
- LibreSprite — used for organizing and editing sprite sheets and tile sheets
- Piskel — used for creating and editing pixel art assets
- BandLab — used for audio editing, music production, and sound mixing
- BeepBox — used for creating retro-inspired music and soundtracks.

Asset Credits and References

Some visual references and sprite assets were inspired by or sourced from:

- The Spriters Resource

The website served as both a reference and inspiration source for selected sprite-based assets used within the project.

Inspirations and References

The project was inspired by:

- Classic Pokemon RPG games
- Retro pixel-art aesthetics
- Tile-based exploration games
- Java Swing game development tutorials
- Survival and exploration game mechanics

Additional Notes:

The project was created for academic and educational purposes. All custom-developed systems, gameplay mechanics, maps, interfaces, and multimedia assets were integrated specifically for the development of the PokéRot project.
